15.00 – 17:45

SESSION 2: PRODUCT INNOVATION – PART 2

MODERATOR

Swapnil Khanolkar, *Managing Director, Fitesa Pune (India)*

15.00 – 15.30

Cost savings and enhanced sustainability by innovative product and machine design

- Highly efficient production concepts with low waste and quick size-changes cut your production costs and reduce the carbon footprint of your product
- Clever thin high-performance fluff/SAP cores to replace airlaid cores offer higher product quality and flexibility, combined with lower logistics costs and reduced stock size.
- Replace single-wrap by TO-GO Ministacks to save 85% of wrapping material, rising your market-share among the young generation thanks to increased product sustainability.
- Biodegradable or recyclable raw materials reduce your environmental impact and greenhouse gases. Our lab machine will allow to test new materials before you take them on your line.

Stefan Scheer, *Sales Manager, Winkler+Dünnebier (Germany)*

15.30 – 16.00

How companies and brands in the hygiene industry can contribute to circular economy and reducing the carbon footprint and benefit of doing so. A step-by-step strategy for the Indian hygiene industry – setting the course for success!

- The transition towards a circular economy offers an opportunity to reduce India's ecological footprint by reducing raw material consumption and minimizing waste generation. It means maintaining the value of resources for as long as possible and rethinking or upgrading production and equipment, consumption and end-of-life management processes.
- According to the 2050 regulation, a long-term vision for the circular economy is needed to set a clear direction and determine how to turn this vision into reality, especially in hygiene converting industry. At ANDRITZ Diatec we have studied solutions for energy saving, optimization of raw material consumption and reduction of waste produced.

Luca Capriotti, *Senior Sales Manager, ANDRITZ Diatec Srl Unipersonale (Italy)*

16.00-16:45

TEA/COFFEE BREAK & NETWORKING

SESSION 2: PRODUCT INNOVATION – PART 2 (CONTINUED)

SESSION 3: SUSTAINABILITY – PART 1

MODERATOR

Shalendra Vasudeva, Chief Marketing Officer, Indorama India Private Limited (India)

10.00 – 10.30

Consumer behavior & sustainability

- What is the consumer behavior in India with regards sustainability?
- Use of sustainable packaging materials in India
- Waste reduction and product optimization
- Challenges of biodegradable product development

Gaurav Bathawal, Co-Founder, Niine (India)

10.30 – 11.00

Sustainability and circularity in absorbent hygiene products industry

- Designing absorbent hygiene products by considering the entire product life-cycle, right from selecting its raw materials to its disposal
- Circularity in ingredients and circularity in products
- Linear economy (Take-Make-Waste) Vs. Circular economy (Take-Make-Compost) Vs. Recycling Economy (Take-Make-Recycle-Waste)
- Challenges with sustainable products: raw materials availability, supply chain challenges, affordability, etc.
- Growing Indian sustainable products market and its preference from Gen Z and millennials
- Possible solutions for making AHP industry more sustainable and future outlook

Chirag Virani, Co-founder, Sparkle Eco Innovations Pvt. Ltd. (USA/India)

11:00 – 11:45

TEA/COFFEE BREAK & NETWORKING

11.45 – 13:15 SESSION 3: SUSTAINABILITY – PART 2

MODERATOR

Johan Berlin, *Managing Director, Investkonsult (Sweden)*

11.45 – 12.15

Opportunities to create sustainable consumer loyalty in the period care market

- Period Care market and consumer needs
- Challenges and impact of her choice of underwear fabrics on pad performance
- Adhesive innovations

Rajasekaran Thangavel, *Technology Manager, Bostik (India)*

12.15 – 12.45

Improving sustainability of wipes and AHP through raw material and functional innovation

- Wipes and hygiene- present composition and concerns Global regulations / India specific waste disposal challenges Alternate material availability, compatibility scan Sustainability scan for material selection
- Performance gaps and innovation required
- Update on innovation status and timelines Future possible designs based on present materials and technologies

Rahul Bansal, *AVP- Global Sales & Marketing Nonwovens, Birla Cellulose (India)*

12.45 – 13.15

Enabling advanced recycling solutions for nonwoven and hygiene industry

- Overview of ExxonMobil's advanced recycling solutions
- Expanding the lifecycle of plastic throughout hygiene value chain
- Creating a regulatory framework that allows the rapid scale-up of plastics recycling

Jose Ruiz, *Product Sustainability, Regulatory Affairs & Operations Manager, Exxon Mobil (Belgium)*

13:15 – 14:45

LUNCH BREAK & NETWORKING

14:45 – 16:15

SESSION 4: PRODUCT SAFETY

14.45 – 15.15

MODERATOR

**EDANA Stewardship Program for Absorbent Hygiene Products - How the industry gives consumers further assurances about the safety of their products**

The safety of Absorbent Hygiene Products and maintaining consumer confidence are the overriding priorities for EDANA and its members. To further strengthen the industry's safety efforts, EDANA and its members have committed to a new level of action and transparency on levels of trace substances with this voluntary programme for diapers, feminine hygiene and adult incontinence products

Luminita Barbu, Regulatory Affairs Director, EDANA (Belgium)
