After months in development, EDANA is delighted to announce a packed programme planned for the International Nonwovens Symposium, to be held in Lyon on 8-9 June 2022. 26 speakers will share their expertise covering a range of nonwovens topics across all type of applications with a predominant emphasis on sustainability and how nonwovens contribute to a better world.

The programme will kick off with a keynote speech by European Bioplastics' Vice-Chair, Mariagiovanna Vetere. *"Producers of all nonwoven applications are looking for more sustainable solutions: Through improved production, product design, and innovative materials. European Bioplastics is glad to be able to contribute to enhancing the sustainability profile of nonwovens"*, said Mariagiovanna Vetere.

The outlook on the bioplastic market data is followed by a session on sustainability, including sustainable design of absorbent hygiene products. Continuing on raw materials, the Symposium will feature innovations such as antimicrobial polymers, new latex binders,
