

INDA and EDANA Jointly Publish the Global Nonwoven Markets Report, A Comprehensive Survey and Outlook Assessing Growth Post-Pandemic

29 September 2021

A new report published by the two leading nonwoven trade associations forecasts strong market demand for nonwovens materials through the next five years, according to the joint publication from EDANA and INDA's Global Nonwoven Markets Report, A Comprehensive Survey and Outlook, 2020–2025.

This is the seventh edition of the Global Nonwoven Markets Report, formerly titled Worldwide Outlook for the Nonwovens Industry, and is available for purchase from both INDA, the Association of the Nonwoven Fabrics Industry, and EDANA, the International Association Serving the Nonwovens and Related Industries.

This comprehensive report provides in-depth information and analysis of the global nonwoven macro drivers, supply and demand, and regional trade. Among the highlights of the report:

- In the historical period (2010–2020) production increased 6.2% annually, led by growth in the spunlaid processes and drylaid hydroentanglement
- China led the growth in production, adding an additional 4.7 million tonnes from the end of 2010 through to the end of 2020, representing a 11.5% annual growth rate
