

The future of transport: from traffic to mobility?

2 May 2019

FILTREX™ 2019 will showcase a range of expert insight from industry professionals active in filtration. To get a taste of it, Gil Stevens, Sustainability Director at EDANA spoke with keynote Dr. Bodo Schwieger, General Manager at team red Deutschland, to understand the future of mobility.

Gil Stevens: You will open FILTREX™ with a keynote exploring the ‘Future of Mobility’. What do you see as the most exciting opportunities in the field? And the biggest challenges?

Bodo Schwieger: The exciting opportunity is in the combination of technologies, such as smartphone and electric mobility, which gives us access to shared devices of all kinds. The major challenge is to minimize emissions down to zero in a very short timeframe.

GS: What technical innovation or concept in this area excites you the most?

BS: Autonomous mobility excites me most, as this will change the mobility experience forever. However, it is a danger and solution at the same time, and it is in our hands to develop this concept into a solution that helps us to preserve the planet instead of
