

EcoVadis: The supply chain is the most powerful lever for sustainability impact

EDANA Sustainability expert webinars

This series of webinars highlights specific topics covered in one of the four pillars of the [EDANA Sustainability Vision](#). They were created to help the nonwovens industry in understanding and processing the abundant information available to strive towards more and viable sustainability solutions.

Previous webinars on Responsible end-of-life: *Chemical recycling in Europe – Pyrolysis - the enabler of chemical recycling of plastic waste*, Eco-efficiency: *Science based targets as foundation of future-proof climate strategies* and Cradle to Cradle: *shifting to a circular economy* attracted hundreds of participants
