PRESS RELEASE

European industries unite to call for an ambitious EU industrial strategy

The Joint Paper presents concrete industrial policy proposals in seven priority fields; business-friendly policy environment, sustainability at business core, upgraded skills and training, enhanced research and innovation, investment and improved access to finance, reinforcement of the European Single Market and strengthened trade and international market access.

The 149 industry organisations behind Industry4Europe stand united in their repeated calls for an ambitious and long-term EU industrial strategy that must help Europe remain a hub for a leading, smart, innovative and sustainable industry, that provides quality jobs and benefits all Europeans and future generations.

“With its skilled workforce and its global reputation for quality and sustainability, our industry is vital for Europe and its prosperity”, said Philippe Citroën, Coordinator of the Industry4Europe Coalition. “The European Union needs an ambitious industrial strategy now to compete with other global regions that have already put industry at the very top of their political agenda. It is essential for a horizontal, coherent and focused industrial policy to support the backbone of the European economy and which protects citizens and the global environment”.

European Commission President-Elect von der Leyen has said clearly in her Political Guidelines for the upcoming mandate that she would, “put forward my plan for a future-ready economy, our new industrial strategy”. The Industry4Europe coalition welcomes this ambition and hopes that its explicit policy recommendations will find a central place in any comprehensive long-term industrial strategy that comes out of the EU institutions.

The Industry4Europe coalition therefore looks forward to working with all policymakers – notably the designated Executive Vice-Presidents Valdis Dombrovskis and Margrethe Vestager and Commissioner Thierry Breton – to discuss and implement such an ambitious and much-needed EU industrial strategy.
