

## EDANA Sustainability expert webinars

This series of webinars highlights specific topics covered in one the four pillars of the [EDANA Sustainability Vision](#). They were created to help the nonwovens industry in understanding and processing the abundant information available to strive towards more and viable sustainability solutions.

Previous webinar on Responsible end-of-life: *Chemical recycling in Europe – Pyrolysis - the enabler of chemical recycling of plastic waste*, took place on 13 September and attracted hundreds of participants
